## Acknowledgements

The author would like to thank staff at Met Éireann, the Marine Institute, Teagasc and the Environmental Protection Agency (EPA) for their collaboration and contributions to this report. In particular, the participation of Séamus Walsh (Met Éireann), Glenn Nolan (Marine Institute) Stuart Green (Teagasc), Phillip O'Brien and Frank McGovern (EPA) through the steering committee was extremely helpful in guiding the report compilation. Moreover, their direct contribution as authors and advisors on many of the chapters was instrumental in ensuring the quality of the work reported.

The contribution of all the authors, listed in Appendix 1, is gratefully acknowledged. They provided text, data, expert opinion and patiently reviewed and edited material during the writing of the report. Numerous others provided access to data and relevant publications and also gave valuable insights into many aspects of the Irish climate monitoring system. These include John Redmond (Forest Service), Paul Leahy, Brian Barrett (University College Cork), Kevin Delaney, Margaret Desmond, David Dodd, Anthony Mannix, Ahmed Nasr, Rebecca Quinn, Deirdre Tierney (EPA), Alison Donnelly (Trinity College Dublin), Denis Griffin, Rogier Schulte (Teagasc), Aditya Vaishya (National University of Ireland Galway), Phillip Woodworth (Proudman Oceanographic Laboratory), Peter Newport (Office of Public Works) and Denis Griffin (Department of Agriculture, Food and the Marine). We also acknowledge the SeaWiFS mission scientists and associated NASA personnel for the production of the data used in this report (ocean colour). The use of imagery and derived data from European Space Agency missions is also gratefully acknowledged.

Sincere thanks to all the photographers who allowed the reproduction of the many beautiful photographs used in illustrating the report. The help of Emily Gleeson of the Irish Meteorological Society is gratefully acknowledged for facilitating access to those photographs which were originally contributed to the Met Society's annual photographic competition.

Finally, I would like to thank my colleagues in the Coastal and Marine Research Centre at University College Cork for technical assistance, useful discussions, contributions to and review of some of the materials used in the report.
